

PRESS RELEASE – Monday 12th July 2010

CLIMATE CHANGE POLICIES KEY TO LONDON'S FUTURE

Leading planning and housing charity, the Town and Country Planning Association (TCPA)^[1] has welcomed the strengthening of climate change and green design policies in the draft London Plan in its submissions to the Examination in Public (EiP)^[2]. The Association has drawn on the TCPA-led EU project, Green and Blue Space Adaptation in Urban Areas and Eco-towns (GRaBS)^[3] for its evidence.

TCPA Chief Executive Kate Henderson said:

“Adapting our towns and cities to the impacts of climate change is one of the greatest challenges society faces today. The London Plan has an important role to play in facilitating a sustainable pattern of urban development in adapting to the effects of climate change. The adaptation agenda has profound implications on the resilience and competitive future of our cities, as well as making them attractive places to live and work - innovative spatial planning will be critical in introducing the measures required to help make London less vulnerable to a changing climate. The Association welcomes the draft London Plan’s commitment to ensure measures such as green open space and green roofs are integrated into plans from the outset.”

“We also welcome the focus on renewable energy solutions for climate change mitigation, however more needs to be done to ensure there is a coherent record kept of what technologies are installed in what location, and robust monitoring undertaken to make certain renewable energy projects comply with the Mayor’s policies and establish an evidence base about the effectiveness of the different technologies.”

The TCPA has made a series of recommendations in its evidence which have been identified by the EiP Panel for discussion, including that the Association would like to see targets in Policy 5.9 for 'Overheating and Cooling' that guarantee a minimum amount of green space per development is achieved. Malmo in Sweden, also a partner in the GRaBS project, is identified as a city with an exemplary approach in that respect, with buildings in public control as a priority, and enforcement monitored through the Implementation Plan.

The TCPA has submitted written evidence on matters 5A and 5C^[4] of the draft London Plan EiP, relating to climate change adaptation and mitigation as well as green design, respectively. These sessions are taking place 15th and 16th July 2010 and the TCPA will be making a representation at session matter 5A, 15th July 2010. The full London Plan EiP runs from 28th June 2010 to 22nd October 2010.

The TCPA is Lead Partner in a European funded "Green and Blue Space Adaptation for Urban Areas and Eco Towns" (GRaBS) project – which sees 14 partners across 8 European Union member states exchanging experience, knowledge and assistance on delivering adaptation through the use of green and blue infrastructure. The project kicked off in September 2008, recognising that adaptation was an integral part of the sustainable development agenda, and its outputs have been central to the TCPA's understanding of the issues. See www.grabs-eu.org for further information about the project, which has been co-financed by the European Union Regional Development Fund (ERDF) and made possible by the INTERREG IVC Programme^[5].

Notes to Editors

1. The [Town and Country Planning Association](http://www.tcpa.org.uk) (TCPA) is an independent campaigning charity calling for more integrated planning based on the principles of

accessibility, sustainability, diversity, and community cohesion. The TCPA puts social justice and the environment at the heart of the debate about planning policy, housing and energy supply. We inspire government, industry and campaigners to take a fresh perspective on major issues including climate change and regeneration. www.tcpa.org.uk.

2. For more information on the **draft replacement London Plan Examination in Public** please see the following website: <http://www.london.gov.uk/london-plan-eip>
3. **History of the GRaBS project proposal** - Working with the two initial partners in the early part of 2007, the TCPA developed an outline GRaBS project proposal, which was presented to UK local and regional government in order to gauge interest in and relevance of both the project idea and the proposed European wide exchange of experience and knowledge. The TCPA decided to offer to take on the Lead Partner role for the new project and together with the **University of Manchester**, the **City District Geuzenveld Sloterveer** (Amsterdam), the **London Borough of Sutton** and **Southampton City Council** began the process of extended European partner search. The aim was to find partners with a range of interests, cultures, experiences and needs, located in a range of climate zones. Towards the end of 2007 the **Province of Genova, Etnambiente**, the **University of Catania** (Italy), the **City of Malmo** (Sweden), the **Municipality of Kalamaria** (Greece), the **Regional Environment Centre for Eastern Europe** (Slovakia), the **Northwest Regional Development Agency** (NWDA), the **Region of Styria** (Austria) and **CORPI** (Lithuania) joined the project as partners.
4. For further detail on the **TCPA submissions** to the draft replacement London Plan Examination in Public please visit <http://www.london.gov.uk/sites/default/files/eip/163TCPA5A.pdf> for matter 5A on climate change mitigation and adaptation and <http://www.london.gov.uk/sites/default/files/eip/163TCPA5C.pdf> for matter 5C on green design.
5. **INTERREG IVC Programme** – the INTERREG IVC Programme is financed through the European Regional Development Fund (ERDF), part of the European Territorial Cooperation Objective of the Structural Fund policies for the period 2007-2013. It aims, by means of interregional cooperation, to improve the

effectiveness of regional development policies and contribute to economic modernisation and increased competitiveness of Europe.
